

17 February 2019

To the Town Council

We are writing to complain about the incinerator at Weston Mill. It is belching out black, grey and white smoke day and night. It is affecting Saltash, Plymouth and surrounding Devon and Cornwall boundaries. We do not want to hear that the pollution levels are not at a maximum level because any pollution level is intolerable! It's not only affecting us but families with children in Saltash and Plymouth areas. In our opinion it should <sup>never</sup> have been built there in the first place. It is such a danger to health!

We await your comments.

In addition to this we are sick and tired

of looking at the disgraceful dilapidated building of the waterside public house in Saltash. It looks horrible, could attract infestation and we feel empathy with the people residing nearby. This matter has gone on long enough, there must be an end to this problem NOW not in the distant future.

Again we await your comments.

Yours faithfully

(Signed):

Mrs C A Manning

Mr C O Manning
