

FROM:

Molly Flynn

Community Flood Resilience Co-ordinator at Cornwall Council

Good afternoon all,

Please find below links to Cornwall Council's Local Flood Risk Management Strategy Consultation. Cornwall Council, as Lead Local Flood Authority, is required to develop, maintain, apply, monitor and publish a Local Strategy for flood risk management. The first Cornwall Local Flood Risk Management Strategy was formally adopted by the Council on 5 November 2014 following a public consultation. The Strategy is now due for its 6-year review. Cornwall Council welcome comments on the draft strategy from organisations, individuals and communities.

This consultation is open until the end of September.
