

PRESS RELEASE

SALTASH TOWN COUNCIL

Saltash Town Council continues working for the people of Saltash, and recently took delivery of two additional vehicles which will enable the Town Council to take direct in house control of maintenance and grounds work which is currently performed by an outside contractor. Not only will this provide efficiencies on cost and a faster response time, it will also reduce the number of miles travelled to carry out the work and our environmental footprint, as the current contractor is based some miles from Saltash.
