

SALTASH TOWN COUNCIL

Announcement

Saltash Town Council continues work with Saltash Environmental Action

Saltash Town Council is continuing to build on the strong partnership with Saltash Environmental Action (SEA) to benefit the town.

The Town Council Climate Change and Environmental Working Group are working with SEA to continue the tree planting work around Saltash. Trees planted this year include a crab apple tree at Saltash Library Hub, two crab apple trees in Carew Gardens and a Gleditsia at Buller Park.

The trees have been provided by Forest for my Place which is a project under the umbrella of Forest for Cornwall. The protection guards and accessories for the trees were funded by Saltash Town Council. Further tree planting is being planned later this year and include Prowse Rise and Spencer Gardens where three silver birches will be planted.

SEA and the Climate Change and Environmental Working Group are hosting a series of talks at Isambard House over the coming months.

For further details please contact SEA at <https://www.seasaltash.org.uk/> or <https://www.facebook.com/seasaltash/>
